Adjustable Clamping Levers • with axial bearing from stainless steel, with female thread
24420.1110

Product Description

Adjustable clamping levers with rust-proof inner parts. Suitable for multiple applications, e.g. medical environments, chemical industry, and so on.
Advantages of axial bearing:
- Double clamping force with same lever size, by reducing the surface friction.
- Protection of workpiece by a fixed locating surface.
- Little setting due to higher pre-clamping force of bolt, e.g. thread.

Material

Lever
- Zinc die-cast, plastic coated, orange similar to RAL 2004, matt structure

Threaded part
- Stainless steel

Inner parts
- Stainless steel

Operation

By lifting the lever the serrations are disengaged. The lever can be positioned by the serrations. On releasing the lever, the serrations are automatically re-engaged.
