# **High Knurled Thumb Screws** • DIN 464

24790.0181

## **Product Description**

Knurled thumb screws are very versatile. Three material versions for the different requirements

- steel, blackened
- · steel, zinc-plated by galvanization
- stainless steel

are available.

Knurled thumb screws can be easily tightened and released by hand. The ribbed outer surface of the nut prevents slipping when tightening / releasing with the fingers.

Knurled screws are one-piece manufactured. Contrary to the Standard Sheet, they are generally manufactured with a thread up to the head and with runout without undercut at the end of the thread. The screws can therefore not be screwed in up to the collar.

#### Material

· Steel, blackened, quality 5.8

#### More information

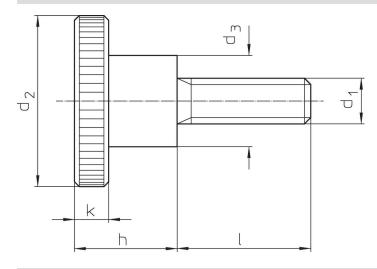

#### Noto

Knurling pitch and knurling depth may differ from DIN.

# **Further products**

• Flat Knurled Thumb Screws, DIN 653
