

Spring Plungers · with ball and slot - INCH

2B050.0012

Product Description

To be used for positioning, indexing, locking, latching as well as for other similar pressure applications.
Spring plungers can be used for locating or for applying pressure, as a detent or for ejection.

Material

- Body**
- Free cutting steel, blackened
- Ball**
- Stainless steel, hardened
- Spring**
- Stainless steel

Characteristic

Light spring load: marked with one line

Light spring load Standard spring load Heavy spring load

More information

Notes

Customized design on request.
Spring plungers are specially tested for spring range and forces.

- This product is manufactured in INCH dimensions.

References

A conversion table can be found in the technical data following these product information pages.
Thread lock: polyamide spot coating (for details please refer to the technical appendix).
Calculation of indexing resistance, please refer to appendix - Technical Data -
