

Short Profile

The company was founded in 1938 by Erwin Halder with the patent registration of the first SIMPLEX mallet. Today, over 80 years later, the company has about 200 employees in Bronnen, Germany. It has an annual turnover of approximately 43 million euros in four product segments.

The core competencies of Erwin Halder KG lie in the development, production and distribution of standard parts and workholding systems as well as of high quality tools for industry and crafts.

The company places great importance on product variety, quality and a personalised customer service. Creativity, know-how and the reliability of the qualified staff are essential components of corporate success.
