# Clamping Catches 22260.0550

# **Product Description**

Clamping catches have a round running taper surface and enable fast and safe clamping and releasing with a relatively large adjustment range and high tensioning force. Due to the small gradient angle of the taper surface, the clamping catch is self-locking.

#### Material

#### **Body**

• Steel, case-hardened, blackened

#### Screw

· Steel, nitrided

Fix with screw bolt M 10 (WS 6). Ensure a tightening torque of max. 40 Nm.

# Operation

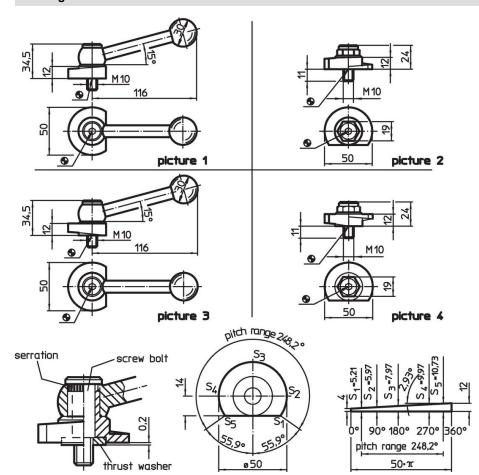

The screw bolt and the washer are adjustable. Once screwed in, the clamping catch can easily be turned to the desired position. For Art. No. 22260.0250 / .0251 and 22260.0450 / .0451, the serration helps to put the tension lever to the preferred position.

#### More information

## Notes

Left turn type can be supplied on request.
