

Self-Aligning Pads • adjustable, self-resetting

22741.0330

**Product Description**

Self-aligning pads are used as stop, support and thrust pad and are suitable for installation in clamping elements.  
By resetting to the parallel position the contact point of the self-aligning pad provides a defined initial position, thus preventing the pad clamping in an oblique position when inserting the workpiece.

**Material**

**Spring element**

- Thermoplastic PUR

**Ball**

- Ball-bearing steel, hardened, bright

**Body**

- Heat-treated steel, tempered, phosphated

**Nut**

- Steel, blackened (ISO 4035)

**More information**

**Notes**

Ball protected against rotating.  
Loading capacity valid for steel and stainless steel designs.  
Special types on request.
