

Centering Clamping Elements · with clamping balls

23340.0254

Product Description

To be used for accurate centering and clamping of workpieces with locating hole on which light spherical marks are acceptable. Exact self-centering with a precision of $\pm 0,025$ mm. The clamping balls frictionally center and hold workpieces with raw or pre-machined surfaces down to the bearing points. Large adjustment stroke and a small building height are a feature of this center clamping element.

Mounting from either top or bottom.

Material

Body

- Tool steel, hardened, blackened

Spring

- Stainless steel

Clamping balls

- Stainless steel 1.4112, hardened and ground

Assembly

Assembly instruction for mounting from above: Remove clamping plate and screw. Screw in threaded pin from below, and tighten from above using female WS_2 .

Further or detailed information can be found in the assembly and operating instructions.
