# High Knurled Thumb Screws • DIN 464 24790.0502

### **Product Description**

Knurled thumb screws are very versatile. Three material versions for the different requirements • steel, blackened

• steel, zinc-plated by galvanization

stainless steel

are available.

Knurled thumb screws can be easily tightened and released by hand. The ribbed outer surface of the nut prevents slipping when tightening / releasing with the fingers.

Knurled screws are one-piece manufactured. Contrary to the Standard Sheet, they are generally manufactured with a thread up to the head and with runout without undercut at the end of the thread. The screws can therefore not be screwed in up to the collar.

### **Material**

 Steel, zinc-plated by galvanization, quality 5.8

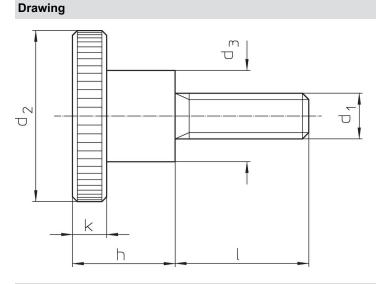

#### More information

#### Notes

Knurling pitch and knurling depth may differ from DIN.

# **Further products**

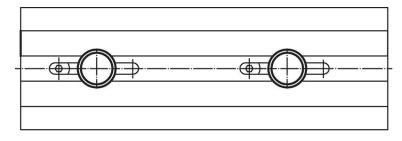

• Flat Knurled Thumb Screws, DIN 653
