

## Spring Plungers · with moveable ball and slot

EH 22051.

## Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart. Another advantage of the plastic ball is the electric insulation.

## Material

## Body

- Free cutting steel, blackened
- Stainless steel 1.4305

## Bearing

- plastic

## Ball

- Ball-bearing steel, hardened
- Stainless steel, hardened

## Spring

- Stainless steel

## Characteristic

Standard spring load: no marking

Heavy spring load: marked with two lines

Standard spring load

Heavy spring load

## More information

## Notes

Special types on request.

Spring plungers are specially tested for spring range and forces.

## References

Thread lock on request, please refer to appendix - Technical Data -  
Calculation of indexing resistance, please refer to appendix - Technical Data -

## Further products

- Locators, with bore hole, for spring plungers
- Locators, smooth, for spring plungers
- Holders, for spring plungers
