

Spring Plungers • long version EH 22070.

Product Description

To be used for ejecting, as a detent, for applying pressure or as a shock element.

Material

Pin

- Steel, case-hardened, black
- Stainless Steel 1.4305, nitrided

Body

- Free cutting steel, blackened
- Stainless steel 1.4305
- Heat-treated steel, tempered, blackened

Spring

- Stainless steel

Assembly

Spring plungers can be mounted and removed by means of the slot or internal hexagon. Please use a special assembly tool for mounting with a slot (pin side).

Characteristic

Standard spring load: no marking

Heavy spring load: marked with two lines

More information

Notes

Special types on request.

Spring plungers are specially tested for spring range and forces.

References

Thread lock: polyamide all-around coating (for details please refer to the technical appendix).
