# **Centering Clamping Elements** • with clamping segments

23340.0054

## **Product Description**

For clamping and centering of workpieces with internal bore. Exact self centering with a precision of  $\pm 0,025$  mm. Due to the clamping segments being ground, workpieces with raw and/or machined surfaces can be frictionally connected, centered and held down at the seats. Large adjustment stroke and a low building height are a feature of the centering clamping element. **Mounting from either top or bottom.** 

#### **Material**

### **Body**

· Tool steel, hardened, blackened

#### Spring

Stainless steel

#### Clamping segments

Stainless steel 1.4112, hardened and ground

#### **Assembly**

Assembly instruction for mounting from above: Remove clamping plate and screw. Screw in threaded pin from below, and tighten from above using female WS<sub>2</sub>.

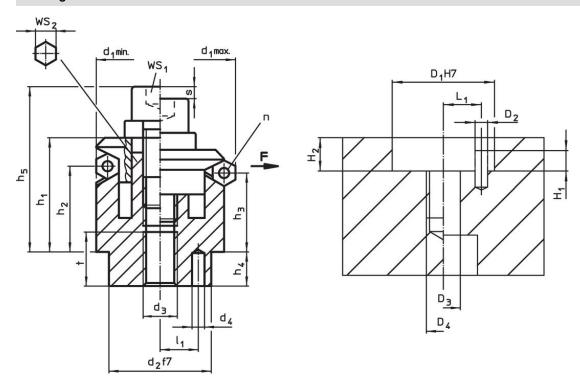

Further or detailed information can be found in the assembly and operating instructions.

#### More information

### **Further products**

- Centering Clamping Elements, with clamping balls
- Centering Clamping Elements, with clamping segments, operation from the bottom
- Centering Clamping Elements, with clamping balls, operation from the bottom
