

Spring Plungers · smooth, with collar and ball, self-clamping – INCH

2B080.0080

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The spring plungers compensate tolerances of up to 0.008" (inches) of the locating hole by self-clamping. This saves costs in the machining of the locating hole.

Material

Body

- Thermoplastic POM, black

Ball

- Stainless steel, hardened

Spring

- Stainless steel

Assembly

Thanks to the flexible design of the body, a direct manual mounting and a secure overhead installation is possible.

More information

Notes

Special types on request.
Spring plungers are specially tested for spring range and forces.
