

## Index Plungers · with locking mechanism push-lock

EH 22111.

### Product Description

Index plungers are used for indexing bores. These index plungers can be locked or unlocked by pressing the button. This push-lock function is based on the built-in mechanism according to the well-known "biros principle". This design and mode of operation make the index plungers suitable for restricted installation situations. By countersinking the index plunger when locked, it can also be protected against any incorrect operation.

### Material
