

POSITIONING CLAMPING PINS

QUICK AND EASY

The positioning clamping pin is centred and clamped with four balls in the locating bush by tightening the clamping bolt. The clamping bolt can be operated manually via a removable handle or using a hex key.

PRODUCT BENEFITS AT A GLANCE

- Benefits thanks to spring pre-loading:
 - Low-wear.
 - Clamping balls and locating hole are protected from being overloaded.
 - No overstressing of the clamping bolt, preventing the pin from jamming.
- Dampens vibrations during machining.
- Protection against accidental release of the pin (e.g. due to vibration).
- High repeatability of ± 0.03 mm.
- Handling facilitated during installation / disassembly thanks to spanner flats and knurls.
- Flat construction height.
- Operation by using a hex key or the optional handle.

**Sample application EH 23111.**

Positioning clamping pin for quick workpiece changes at the machine table.
