

SINGLE PIECE FORGING

→ REINFORCED CAST IRON HOUSING

Increased wall strength and bracing in this reinforced cast iron housing ensure high stability – especially when using SIMPLEX copper inserts. The additional increase in weight gives the mallet far higher impact.

→ ALUMINIUM HOUSING

Delivering high precision inserts is possible thanks to an extremely lightweight-housing. Mallets with this housing are precise and well suited for work on sensitive workpieces.

→ CAST IRON HOUSING

High resistance to breakage as the handle-protection sleeve is integrated into the cast iron housing make this mallet a robust, all-purpose weapon while reducing both noise and vibration.
